LEAP-HI Survey

Start of Block: Consent Form

Dear Resident, Arizona State University is conducting a study, funded by the National Science Foundation, to better understand how people adapt to disruptive events, such as pandemics, extreme weather, and power outages. This information will be used to develop tools to help communities prepare for future events and be more resilient and adaptive. Your participation is voluntary, but very important. Your responses to the survey will be treated in strict confidence. **The results of the study will be published only in summary form so that your identity and privacy are fully protected.** Your de-identified data will be shared only within the study team, and any publicly shared data will be in statistical summary form only. Your information collected as part of this research will not be used or distributed for any future studies. The survey will take about 25 minutes to complete, and we think you will find it interesting and fun to do. Please submit only one response per person to ensure statistical validity of the study. The survey will stay open through **December 31, 2024** to make sure everyone has a chance to help shape the future of our communities. There are no foreseeable risks or discomforts from your participation. Refusal to participate or discontinuing participation at any time will result in no penalty or loss of benefits to which you are otherwise entitled. Compensation for completing the survey will be in the amount previously agreed upon when you started the survey as a member of a Qualtrics Panel. Thank you in advance for your participation in this important study. This survey is being administered by Arizona State University. For more information about the study, please contact Dr. Eleanor Hennessy (ehenness@asu.edu) or Dr. Irfan Batur (ibatur@asu.edu). Sincerely, Dr. Eleanor Hennessy School of Sustainable Engineering and the Built Environment Arizona State University ***Clicking "Agree" implies that you are 18 years or older, you have read the above statement, and you agree to participate in this study. This research is conducted by ASU, funded by a grant from the National Science Foundation.
